Reception Homework—26/2/16

The ideas below are just some suggestions of things you can do this week to support the learning we have been doing in class. Record all learning in your child's homework book and feel free to write, draw, stick or take photographs (whatever you need to engage your child).

Literacy

- Read with your child and make a comment in their reading record book daily (don't forget on RM books there are lots of nocturnal animal books in the school library).
- This week we have read, shared and role played the story of Owl Babies. If you have a copy share it with your child (if you haven't see if you can get one from Thornaby library or watch it on You Tube by searching Owl Babies).
- Practice the relevant words sent home (reading or spelling).

Mathematics

- # This week we have been looking at subtraction (take away, less). This is best supported with the use of objects (food works well) . If you give your child a group of objects (10 is best to start with) then you can roll a dice and your child can take that number away (eat the amount!)—how many is left? We have looked at recording this using minus sign—and =.
- # This week we have learnt to count in 5's. Help your child say the multiples of 5 up to 50 (5, 10, 15, 20, 25, 30, 35, 40, 45, 50).

As you know we brush our teeth in school daily. Using the attached sheet can you help your child to record their own tooth brushing at home—it may be a tick list of when brushed, a photograph of them with their toothbrush, you can write about a tooth brushing/dentist achievement, stick/draw things your child does to keep teeth healthy. **Please don't** stick this work into your child's homework book. We will place it in their learning journey book and it will contribute towards the evidence we are collecting for the end of Reception early learning goals.

Don't miss out on daily tweets about life in Reception.

Follow @vptted and share your child's learning at school. We love getting tweets about what your family are getting up to at home.
