

Art Monitoring 2021

Autumn Term

Year 5

Pupil Voice

What we are learning:

This term we are learning about William Morris. He is a famous Victorian painter. He invented coloured wallpaper. He had to hand paint it before factories were invented. He does nature sketches.

We learn new skills

We sketch with pencils. First we did a rough sketch. Like a rough outline with added detail. Like notes in art form. We jot down our ideas in drawing instead of writing. It helps us work towards our finished piece. William Morris has showed us how to do repetitive pattern. We've used coloured pencils, pencils and felt tips.

Progress in art

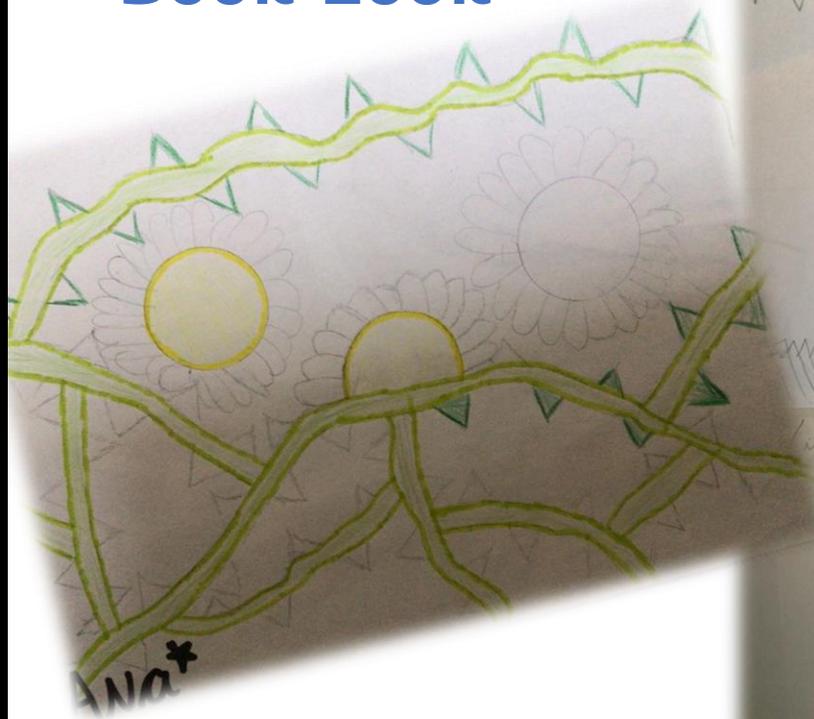

First my sketch looked like not the one I wanted it to look like from the photo but after practice I improved. When we get stuck we could look on YouTube at an art tutorial similar to what we are doing. It wouldn't need to be the same, it could just be the part that you need for your drawing. Or, we could try again. Practice makes perfect! We could change some of our first steps to make it better. We could Google the artist and copy the picture or you could change it a bit...it doesn't have to be exact.

Our next steps

Myles: I'd like to get better at drawing people and colouring in between the lines.
Ben: I want to be able to colour in without leaving white gaps.
Ava: I want to get better at drawing people's arms.

Book Look

Strengths:

- Enthusiasm for the subject
- Knowledge of the topic
- Use of sketchbooks to build towards a final piece

Next steps:

- Oils pastels and chalk pastels
- Myles wasn't sure what a sketch was. Use DART books to target art vocabulary little and often.
