

Mrs Gunn, Computing and E-safety Lead

Computing and e-safety are subjects I am passionate about. I love enabling staff with the knowledge and resources to teach the children a progressive curriculum. My vision is to ensure children are ready for a unknown technological future and are creators of technology not just consumers! I am a driving force behind e-safety and make sure we are up-to-date with our training to ensure children know how stay safe in and out of school on the online world. As a Seesaw Ambassador I'm passionate about using new online resources with caution—they must be purposeful and fit the needs of the users. I enjoy working with children across the school in Code Club and love to see how creative and resilient coding allows learners to be.
