

Mr Mansell, Mathematics Leader

I have always been passionate about Mathematics. I love teaching different concepts and seeing the children apply their learning in new ways. There are so many facts and methods to teach and learn. It is wonderful watching the children make progress. I especially like to hear the children being enthusiastic about their learning. I love to hear how they apply their learning to complete challenges. The most satisfying part of leading Mathematics is knowing that we are equipping the children with a skill for life.
