

Mr Davies, Deputy Head teacher  
Science Leader

Science is a subject I am passionate about. I love teaching different areas in science and creating questions to investigate. There are so many facts and so much knowledge I can impart. It is great to see the progression of skills and knowledge throughout the year groups. I love to organise to read investigation write ups and see pictures of the children being 'Scientists'. The most satisfying part of leading Science is discovering facts about the world we live in and the way everyday life is full of science and we don't even realise !
